DevX NG monthly summary - October

Cluster - ITPS

Monday	Tuesday	Wednesday	Thursday	Friday	Details
			01/10	02/10	Smooth experience
05/10	06/10	07/10	08/10	09/10	Smooth experience
12/10	13/10	14/10	15/10	16/10	CI/cache incident (12/10) + volume attachment capacity case (13/10)
19/10	20/10	21/10	22/10	23/10	Smooth experience
26/10	27/10	28/10	29/10	30/10	GLM 5.3 / Qwen 3.8 rate-limit pressure persisted (27/10 & 30/10); further capacity increase planned after infrastructure migration on 03/11. PHP security fix deployed on all ITP DevX Studio instances.

Highlight

(*) - Overall, DevX service remained stable throughout October, with partial incidents on 12/10 (CI restart reused an outdated cache; service restored), 13/10 (single-user server startup blocked by volume attachment limits), 27/10 (strong GLM 5.3 adoption caused a concurrent-usage peak and rate-limit errors) and 30/10 (GLM 5.3 and Qwen 3.8 continued to hit rate limits despite the previous increase). A further rate-limit increase is planned after migration to more powerful infrastructure on 03/11. Progress also included the AI4Dev daily token allowance increase from 20M to 100M, NextGen capacity planning, GLM 5.3 availability, Qwen 3.8 active on the backend and internal model qualification. All ITP DevX Studio instances are up to date with the latest PHP security fix.

Bloquants critiques | Bloquants partiels | Expérience fluide | AECC

Main pain points

DevX Studio NG	AI4Dev	Title	Description	Reported	Owner	Status	Trend
X		CI / cache incident	A CI restart reused an outdated cache and impacted the service; service was restored.	12/10/2026	DevX team	Resolved	✓
X		Volume attachment capacity	Single-user/server case: startup blocked because cluster nodes reached the maximum attachable volume count.	13/10/2026	Infra / DevX	Investigating	–
	X	GLM 5.3 / Qwen 3.8 rate limiting	Rate-limit issues persisted on GLM 5.3 and Qwen 3.8 despite the previous increase. A further increase is planned after migration to more powerful infrastructure on 03/11.	27/10/2026	DevX / LLMaaS	Ongoing / upgrade planned	–
X		Security fix rollout	All ITP DevX Studio instances are now up to date with the latest PHP security fix.	26/10/2026	DevX Studio Team	Completed	✓
	X	Model freshness / version visibility	Recent framework knowledge can lag behind fast-moving versions, and the UI may temporarily show Qwen 3.6 while Qwen 3.8 runs on the backend.	29/10/2026	DevX / AI4Dev	To improve	–
